

Suspect Gaucher Disease? Get tested.

Information for you and your health care professional

Once Gaucher disease is suspected, testing is straightforward. It's called a Gaucher enzyme test, and it's just a simple blood test. Your doctor can collect a blood sample and send it to a laboratory for testing, often at little or no cost to you.

Talk to your doctor about getting tested:

- If you are experiencing signs and symptoms of Gaucher disease, such as:

BONE PAIN

FREQUENT NOSEBLEEDS

FATIGUE

BRUISING EASILY

- If you are of Ashkenazi Jewish descent
- If someone in your family has been diagnosed with Gaucher disease

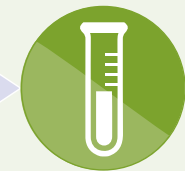

When your doctor may suspect Gaucher disease

OR

AND

If you have an enlarged spleen

(called splenomegaly)

- The spleen may swell up to 15 times normal size
- The abdomen may protrude, appearing overweight or pregnant

Your blood platelet count is low

(called thrombocytopenia)

- Lowered ability to form clots
- Increased tendency for bruising and bleeding
- Frequent heavy nosebleeds and bleeding gums

Your doctor rules out any blood cancer or disease

(called hematologic malignancies)

THEN

Your doctor will probably want to perform a simple blood test for Gaucher disease

Enzyme testing is the gold standard for diagnosing Gaucher disease.

In healthy individuals, the test shows white blood cells that contain normal enzyme activity; in individuals with Gaucher disease, enzyme activity is much lower. Your doctor can explain more about how this simple test helps diagnose Gaucher disease.

Testing information for you and your health care professional

Labs across the United States offer diagnostic tests for Gaucher disease. Testing sample requirements depend on the type of test your physician may perform and can include: whole blood, dried blood spot, saliva and buccal swab. Below are some available options, but this is not an all-inclusive list.

LAB	TESTS	TIMING	FREE SERVICE	CONTACT
ARUP Laboratories	Enzyme	3-10 days	No	1-800-522-2787 clientservices@aruplab.com www.aruplab.com
Children's Hospital of Philadelphia (CHOP)	Enzyme	2-3 weeks	No	1-215-590-3394 metaboliclab@email.chop.edu www.chop.edu
Duke University Hospital	Enzyme	2-4 days	No	1-919-549-0445 https://testcatalog.duke.edu
